Competitive Programmer | Open for discussions on mathematical thinking and data structures and algorithms | Software development and web application development enthusiast

Dhaka, Bangladesh

Summary

Hi there !

I hope you are well by the grace of Almighty Allah. ❤

Programming has always been a love for me. Whatever I have done in my life until now, I have followed my heart. So, learning to program or learning to code whatever you say, the decision came from my heart and now pretty much everyday I program and code and I love it. I love to explore computer science technologies and it has become a place of passion for me.

In my free time, I love to watch football matches. I would also like to play football and cricket outside to pass my free time. I also love watching movies in my free time.

Experience

CodSoft
Web Development Intern
December 2023 - Present (1 month)
